Tables and Figures Packet

Department of Agricultural and Resource Economics
Colorado State University

Reporting period: 2021 through August 2026

Items are ordered by first appearance in the strategic draft. The packet includes only tables and figures supported by currently available data.

Contents in narrative order

- Appendix Table A1: Faculty Data Snapshot
- Appendix Table D2: Peer-reviewed publications by research area
- Table 4.1: Peer-reviewed journal publication productivity
- Appendix Figure D1: Annual peer-reviewed publication output
- Appendix Figure D2: Publications relative to faculty capacity

Appendix Table D2. Peer-reviewed publications by research area, 2021-2026

Publications spanning research areas are shown separately and counted once in the department total.

Year	Agricultural Education	Agricultural and Food Economics	Environmental and Natural Resource Economics	Cross-area	Unclassified	Department total
2021	0	26	21	1	0	48
2022	1	24	18	1	0	44
2023	1	22	15	1	0	39
2024	0	30	16	2	0	48
2025	3	34	14	6	0	57
2026 partial	1	18	8	1	0	28

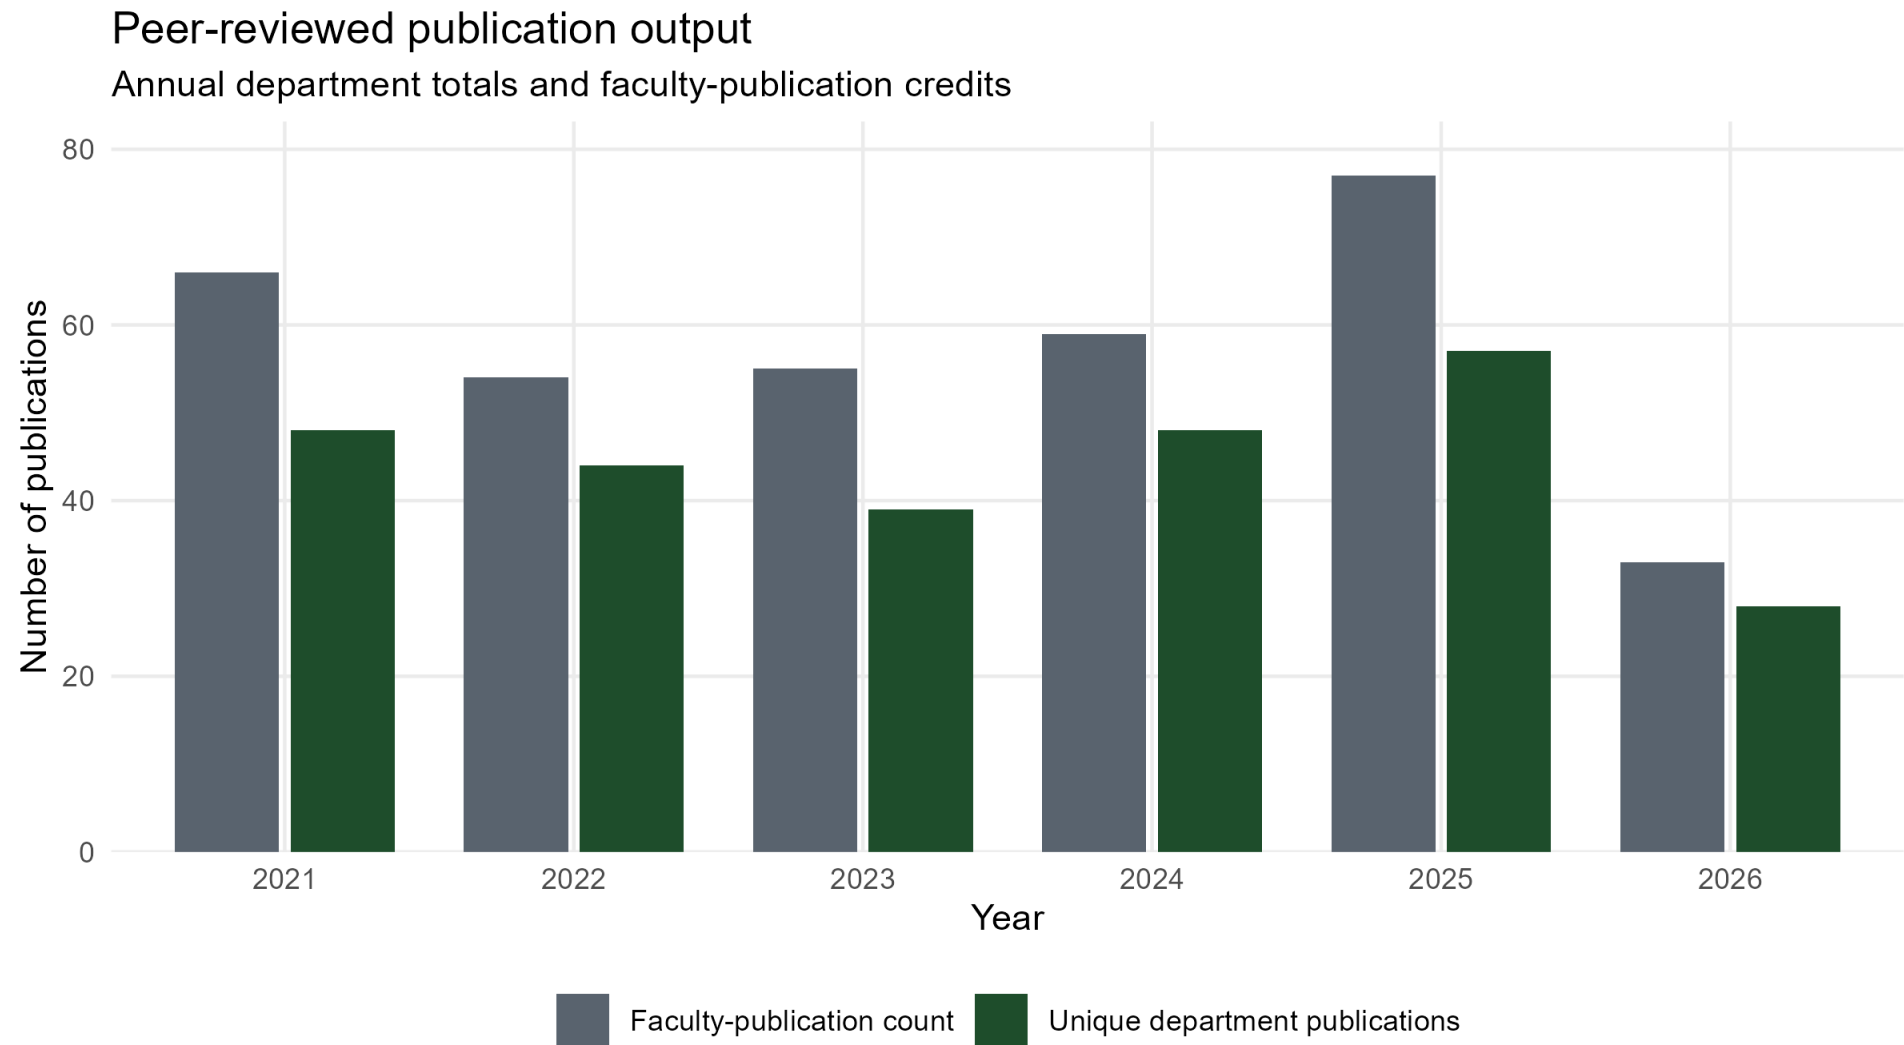

Table 4.1. Peer-reviewed journal publication productivity, 2021-2026

A faculty-publication credit counts one publication for each participating DARE faculty member; unique publications count each article once for the department.

Year	Active tenure-track faculty	Unique department publications	Faculty-publication credits
2021	24	48	66
2022	23	44	54
2023	25	39	55
2024	26	48	59
2025	25	57	77
2026 partial	25	28	33
Total		264	344

Appendix Figure D1. Annual peer-reviewed publication output

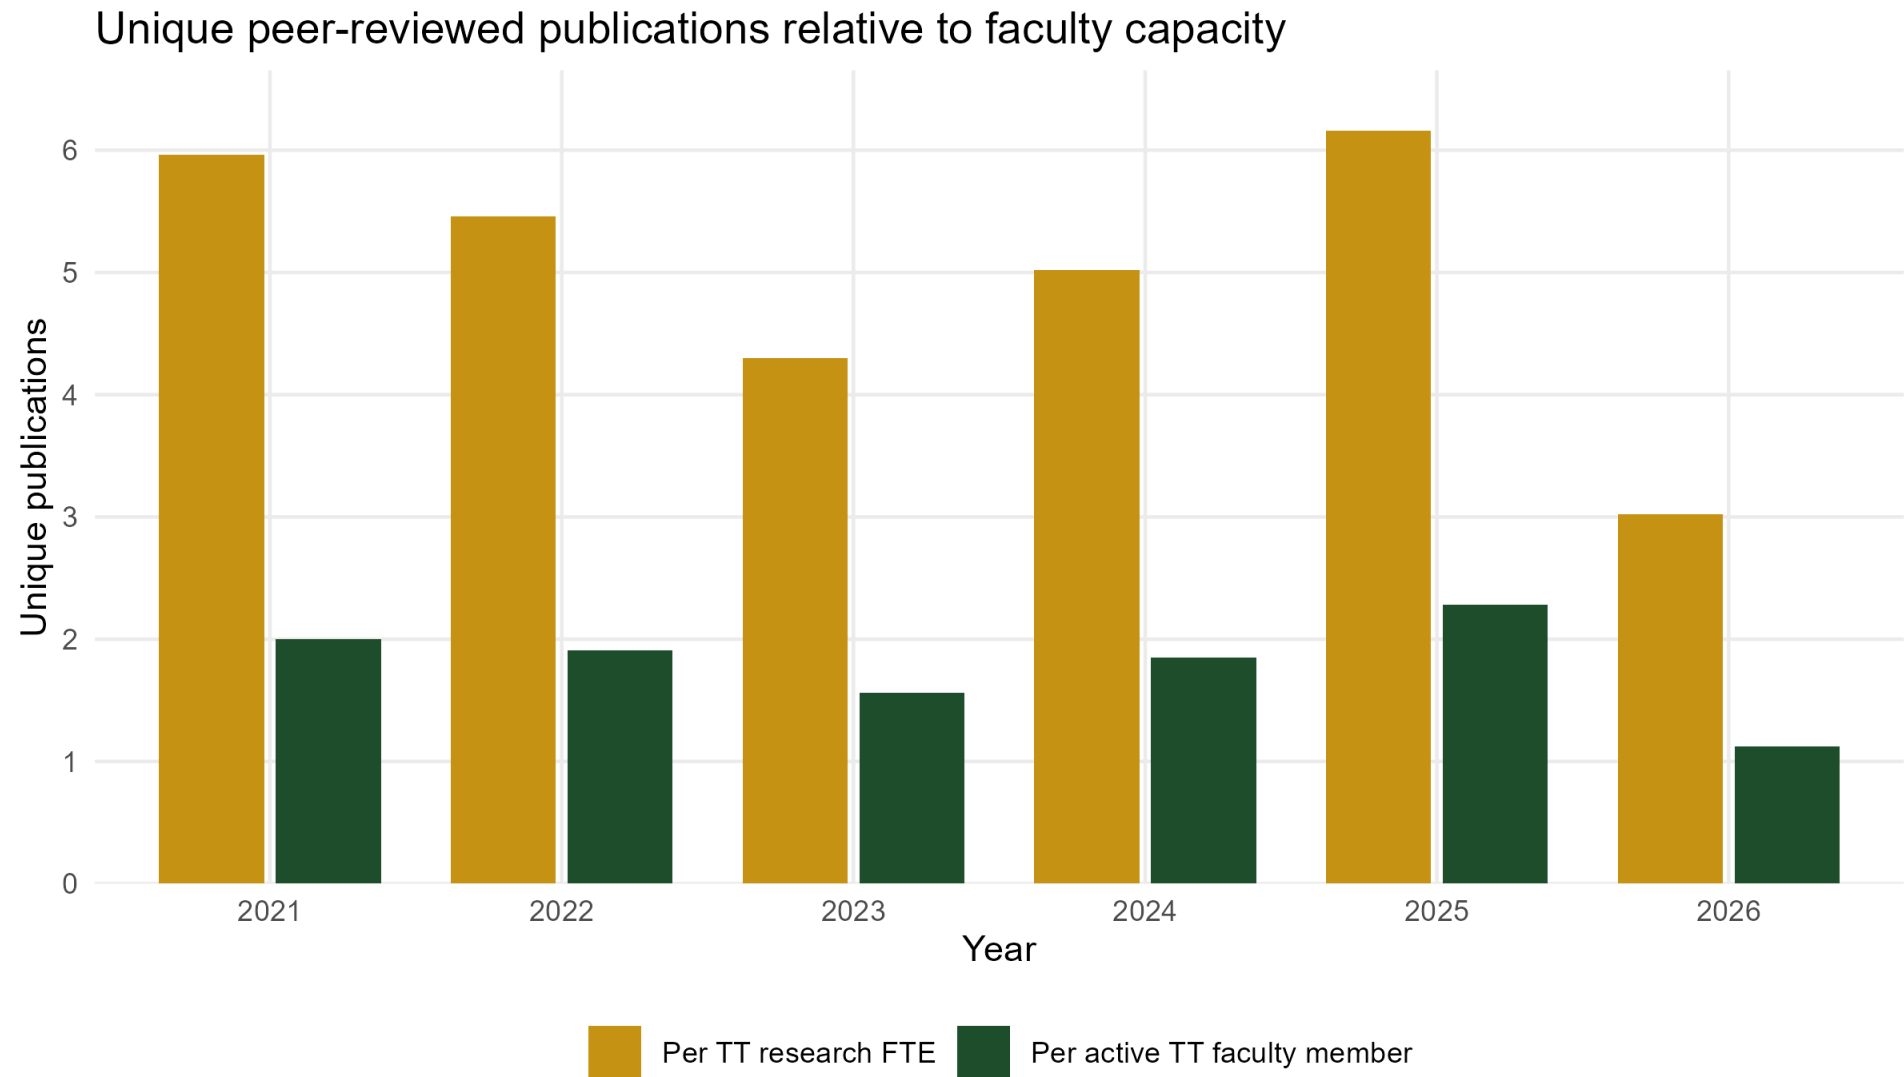

The 2026 value represents a partial year through August.

Faculty collaboration within the department is common.
Faculty-publication count gives each department faculty author credit.
Unique department publications count each paper once.

Appendix Figure D2. Publications relative to faculty capacity

Headcount and research FTE describe the same faculty from different perspectives; 2026 is partial.

The per-faculty measure uses active TT headcount.
The research-FTE measure adjusts for the share of faculty appointments assigned to research.

Table 4.2. Citation and journal-placement indicators by publication year, 2021-2026

Google Scholar citations are cumulative and older publication cohorts have had more time to accrue citations. Journal IF is the publication-weighted average among publications with an available impact factor.

Publication year	Publications	Google Scholar citations	Mean citations per publication	Median citations per publication	Percentage cited	Publication-weighted average journal IF
2021	48	1,989	41.44	20.00	97.9%	6.57
2022	44	1,188	27.00	17.50	93.2%	4.17
2023	39	539	13.82	9.00	97.4%	4.16
2024	48	593	12.35	6.50	85.4%	3.32
2025	57	286	5.02	3.00	77.2%	5.90
2026 partial	28	54	1.93	1.00	53.6%	6.32
Total	264	4,649	17.61	6.00	85.6%	5.07

Table 4.3. Journals with the largest numbers of DARE publications

Journals are ranked by the number of unique DARE publications during the review period.

Journal	Publications	Average impact factor	Total Google Scholar citations	Average Google Scholar citations per publication
Applied Economic Perspectives and Policy	21	4.57	416	19.81
American Journal of Agricultural Economics	11	4.29	483	43.91
Rangeland Ecology & Management	11	2.71	67	6.09
Western Economics Forum	11	Not available	42	3.82
Food Policy	7	6.37	85	12.14
Q Open	7	2.30	117	16.71

Journal of the Agricultural and Applied Economics Association	6	1.80	22	3.67
Journal of Agricultural and Resource Economics	6	1.38	37	6.17
Translational Animal Science	5	1.84	45	9.00

Appendix Table D3. Other scholarly outputs by year, 2021-2026

These outputs are reported separately from peer-reviewed journal publication totals.

Output category	2021	2022	2023	2024	2025	2026	Six-year total
Conference proceedings	0	0	0	0	1	0	1

Appendix Figure B1. Scholarly Research Index distribution among public land-grant peers

DARE's Stage 1 model excludes four faculty without a research role in this benchmark.

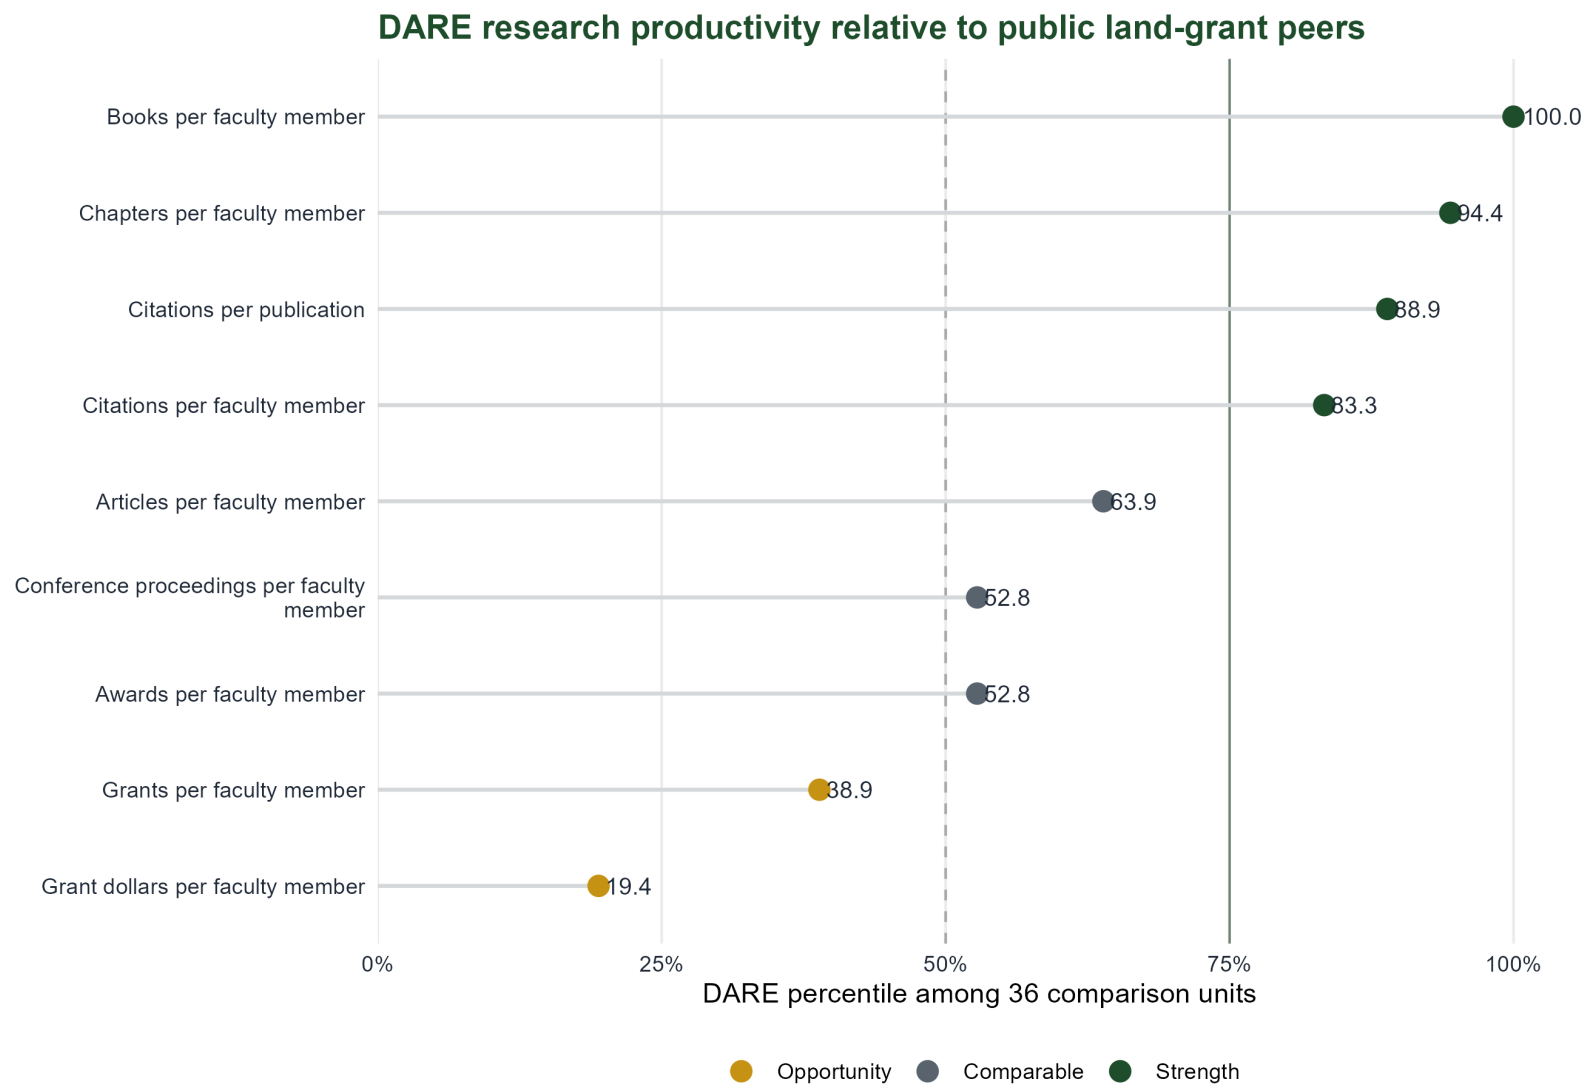

Dashed line marks the peer median. DARE Stage 1 excludes four faculty without a research role.

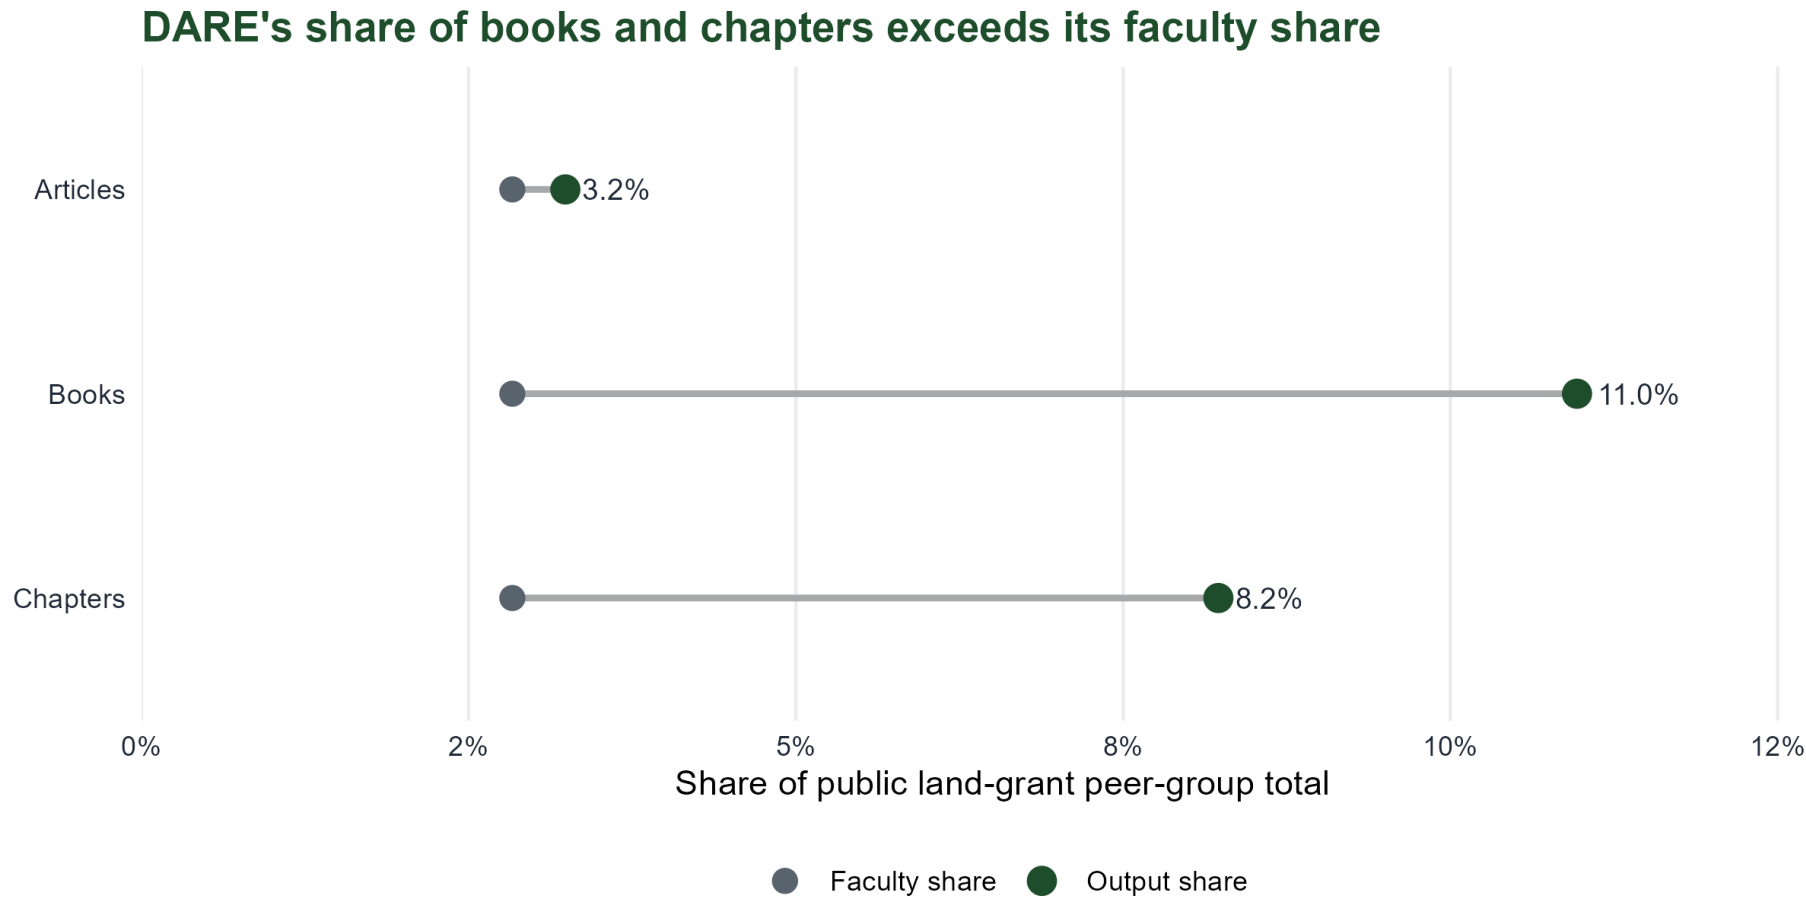

Figure 4.1. DARE research productivity relative to public land-grant peers

Strength = 75th percentile or higher; comparable = 40th-74.9th; opportunity = below 40th.
Metric coverage periods vary in Academic Analytics; source release AAD2024.04.02904.

Appendix Figure B3. DARE output share relative to faculty share

Peer totals replace DARE's unfiltered values with the 21-member Stage 1 unit values.

Peer totals were adjusted to replace DARE's unfiltered values with its Stage 1 values.

Appendix Table D4. Academic Analytics citation-impact indicators

These indicators support peer comparison and should not be combined with the Google Scholar totals in Table 4.2 because coverage and definitions differ.

Indicator	DARE value	DARE rank	DARE percentile	Peer units	Data source	Data release
Citations per Publication	21.38	5	88.9	36	Academic Analytics	AAD2024.04.02904

Table 4.4. DARE-led sponsored-project activity by proposal year, 2021-2026

Awards are assigned to the proposal-submission cohort and multi-year award totals are counted once. The 2026 cohort is partial.

Year	Proposals submitted	Funded award count	Total award dollars	Average award amount
2021	27	19	\$3,275,393	\$172,389
2022	36	23	\$5,168,809	\$224,731

Appendix Table C1. Sponsored-project activity and faculty leadership by year, 2021-2026

Faculty PI/co-PI counts cover active, rostered DARE faculty participating anywhere in the CAS project records. A person serving in both roles is counted once in the combined column.

Year	Active faculty	Proposals	Awards	Award dollars	Average award	Faculty PI	Faculty co-PI	Unique PI or co-PI	Share of active faculty
2021	25	27	19	\$3,275,393	\$172,389	10	11	15	60.0%
2022	25	36	23	\$5,168,809	\$224,731	15	7	16	64.0%

Appendix Figure C1. Distribution of F&A rates by direct-sponsor category

Pass-through institutions are reported separately. Categories labeled Other are excluded from the figure but remain in the underlying grant records.

Appendix Table E1. Within-department research collaboration

Each publication is counted once in the unique-publication total.

Year	Unique publications	Publications with 2+ DARE faculty	Share with multiple DARE faculty	Cross-area publications	Faculty involved

Appendix Table H1. Research strengths, anticipated challenges, and resource priorities

Evidence and strength	Anticipated challenge or opportunity	Resource or action needed	Intended effect
264 peer-reviewed publications and 344 faculty-publication credits across mixed appointments	Sustain output and quality as teaching, Extension, and service demands continue	Protect research time where strategically warranted; maintain access to data, software, and research assistance	Preserve scholarly productivity and support ambitious work
Strong journal placement and 4,649 verified citations; SRI percentile rank of 91.7 among public land-grant peers	Maintain a consistent benchmark and test whether conclusions change under an R1-only comparison	Secure recurring Academic Analytics access, document metric windows and faculty inclusion rules, and assign responsibility for annual benchmarking	Support defensible claims about national standing and identify specific areas for improvement
\$63.42 million in awards and leadership of a \$50.0 million regional initiative	Reduce dependence on a small number of federal sponsors without weakening productive USDA relationships	Provide proposal-development support, interdisciplinary seed funding, and partner development for state, foundation, nonprofit, and mission-aligned industry opportunities	Increase portfolio resilience and create new pathways for impact
Two-way CAS project collaboration and 325 documented external publication partners	Convert broad relationships into sustained interdisciplinary programs and proposals	Support cross-college team formation, shared research staff, and development of multistate and multi-institution proposals	Extend the scope, competitiveness, and application of DARE research
75 student-coauthored outputs, 441 new faculty committee roles, and 14 student awards	Expand access to research experiences and document career outcomes	Increase graduate research assistant, undergraduate research, travel, data, and software support; record participation and outcomes consistently	Prepare students for research-intensive academic, public, nonprofit, and private-sector careers
Competitive faculty recognition and several evidence-based nomination prospects	Translate scholarly accomplishment into greater disciplinary visibility	Continue the awards committee's nomination planning and provide administrative support for nomination packages	Increase consideration for university awards, fellowships, association honors, editorial leadership, and national recognition
Strong award data but no comparable expenditure series	Demonstrate how sponsored resources support people, students, and research activity	Obtain annual expenditure and appointment data from central and college systems	Distinguish awards from expenditures and support valid CAS and R1 comparisons
Breadth across AFE, ENRE, and AgEd	Recruit and retain faculty in priority fields while maintaining coverage during retirements and departures	Use a multiyear hiring plan, competitive start-up support, mentoring, and clear workload expectations	Preserve disciplinary depth and support emerging research priorities
Shared computing services and proprietary consumer, retail, sensory, location, and foot-traffic data	Sustain and expand infrastructure that depends on licenses, secure storage, technical administration, and responsible data governance	Maintain data licenses, computing and storage capacity, technical support, research staff, software, survey and fieldwork support, and clear access procedures	Differentiate DARE from peer programs and support externally competitive faculty and student research
