International experience:

I have benefited from periods of residence in Argentina, Brazil, Canada, Costa Rica, England, France, Honduras, Italy and Switzerland. I can use English, Spanish and Portuguese proficiently, if not perfectly. I have travel experience in about 90 countries with considerable professional experience globally.

Courses/Short Courses/Workshops:

I have taught courses in environmental & natural resource economics, (international, agricultural, sustainable) economic development, agricultural policy, economics of outdoor recreation, and social benefit cost analysis to graduate & undergraduate students of economics, tourism management, natural resource management & business at a variety of institutions. I have or can develop workshops for lay or professional audiences on tools in biodiversity finance, agricultural land and open space preservation or growth management, agricultural, natural resource and environmental policy, project analysis, valuation of ecosystem services, & tools approaches to community & natural resource based economic development & analysis. My research interests closely parallel my teaching with special emphasis on the community economics of nature-based tourism, biodiversity finance, private lands conservation and policy, valuation of natural resources, & social benefit cost analysis of environmental projects.
